

The Solution:

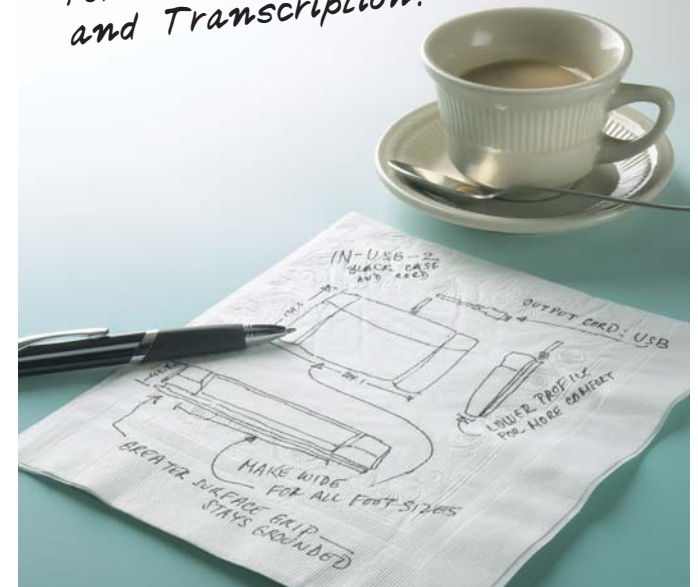

INFINITY IN-USB-2

The future generation of foot control technologies...
Engineered for infinite performance

The Need:

*Design and Develop a
New Level of Excellence
for "Hands Free" Dictation
and Transcription!*

It began with a need...

It began with a need, more than a decade ago, for a solution to “hands-free” dictation and transcription. We realized, long ago, that the answer lay right at our feet! Putting our best foot forward, with unparalleled engineering success, we’ve made the Best... *en BETTERv*

The INFINITY IN-USB-2 is truly engineered for infinite performance!

With years of experience and expertise to our advantage, we proudly introduce the latest generation of foot control design and technologies, all integrated into the new INFINITY IN-USB-2 Digital Foot Control. The resilient construction and durable internal switches of this new digital foot control has been redesigned and engineered from the floor up.

Put your foot down... demand the Best!

Check out all the outstanding features of the new INFINITY IN-USB-2 Digital Foot Control... and try one on for size! You’ll agree, it just doesn’t get any better.

Ready to experience the latest in digital foot control technologies?

Put your best foot FORWARD!

1. Holds its own!

Weighing 2.3 lbs., it stands its ground... regardless of foot size.

2. Stays put!

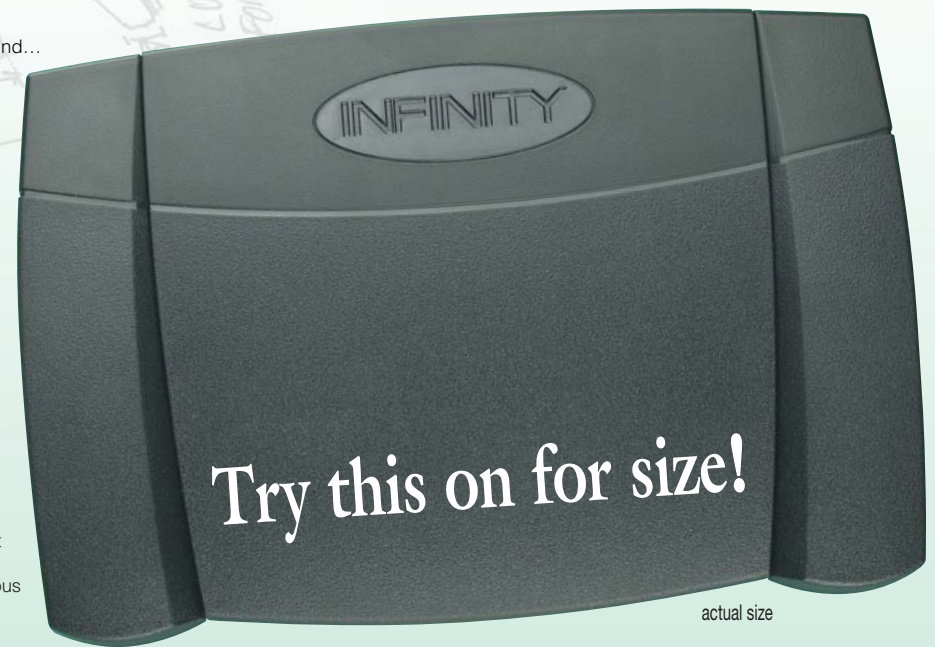

With greater surface contact the INFINITY IN-USB-2 doesn’t slip, creep or walk away from you.

3. Low profile personality!

The re-sculpted contour of the new INFINITY IN-USB-2 offers a lower profile between the floor and the pedal. This design also gives you a wider flare at the base of the foot pedal, giving you greater flexibility in foot size and foot movement.

4. An easy touch!

Internally, the new INFINITY IN-USB-2 incorporates extremely durable and sensitive switches that provide you with an “easy-touch” and minimal resistance for continuous long-lasting comfort.
